The story of our valves

**IT'S BEEN A LONG WAY TO HI-TECH INDUSTRIAL VALVES.
BUT SOME THINGS HAVE NEVER CHANGED.**

From the early inventions and products back in 1889 to over 10.000 worldwide projects nowadays, there are four simple things we're always keeping in mind: flexibility, innovativeness, quality and trustworthiness.

PRUSS.id:

You are only one click away from seamless support of your PRUSS products. PRUSS.id is your direct link to precise support. Doesn't matter if you need documentation, spares or onsite service. Each of our valves carries a QR-Code on their type plate. The QR-Code contains the exact required data we need to provide you the needed information you are looking for.

Just scan the QR code with your mobile device and click in the automatically opening e-mail, the kind of support you are looking for and send it to our specialists. They will reply with the requested information, or will guide you to the right contact in our organization.

PRUSS PROVIDES EXPERIENCED AND SPECIALIZED SOLUTIONS IN FOLLOWING BRANCHES:

POWER INDUSTRY

When producing energy at high pressures and temperatures, valves are important components of the overall system. PRUSS products are efficient components that can be individually customised for your application in the power station sector. We have the best solution for every application.

POWER TO X (H₂-APPLICATIONS)

For more than 130 years, Pruss has established itself as a reliable manufacturer of advanced valves for special applications. For decades, our valves have been used in hydrogen applications worldwide.

STEEL INDUSTRY

The worldwide demand for metallurgical products requires a constant development of high-tech products for their production. PRUSS valves are an important component of the overall process.

PETROCHEMICAL INDUSTRY

Chemical products have a broad spectrum of features. PRUSS delivers product solutions for the production and processing of numerous special applications.

OIL AND GAS INDUSTRY

The production, distribution and storage of oil and gas products requires a high level of safety. Our high-end products specialized on controlling and regulating focus immensely on this safety matter.
